Introduction

To protect our environment and conserve natural resources, this Abridged user’s manual provides you with the basic installation and use instructions. A limited set of features are described in abbreviated form.

Please refer to the online Complete user’s manual for a full set of installation and operation instructions at www.vtechphones.com.

Before using this VTech product, please read Important safety instructions on pages 3-4 of this user’s manual.

Parts checklist
Your telephone package contains the following items. Save your sales receipt and original packaging in the event warranty service is necessary.

Telephone base
Cordless handset (1 for CS6649)
(2 for CS6648-2/CS6649-2)
(3 for CS6649-3)
Corded handset
(1 for CS6649)
(2 for CS6648-2/CS6649-2)
(3 for CS6649-3)
Telephone line cord
Battery compartment cover (1 for CS6649)
(2 for CS6648-2/CS6649-2)
(3 for CS6649-3)
Battery (1 for CS6649)
(2 for CS6648-2/CS6649-2)
(3 for CS6649-3)

Install the telephone base and handset charger as shown below.

Telephone base
Telephone line cord
Battery compartment cover
Charger adapter
Telephone base power adapter
Electrical outlet not controlled by a wall switch
Telephone wall jack
Abridged user’s manual
Quick start guide

Telephone base charger and adapter
(1 for CS6649)
(2 for CS6648-2/CS6649-2)
(3 for CS6649-3)

Use only the power adapter and battery supplied with this product. To order a replacement, visit our website at www.vtechphones.com or call 1 (800) 595-9511. In Canada, go to www.vtechcanada.com or call 1 (800) 267-7377.
Tabletop to wall mount installation

The telephone comes ready for tabletop use. Follow the steps below to mount your telephone on a wall.

1. Unplug the power adapter and telephone line from the wall outlets.
   Remove the power adapter and telephone line from the grooves.

2. Squeeze the tabs on the wall mount bracket as the arrows indicated below.
   Swivel the wall mount bracket down.

3. Route the telephone line cord through the cavity and leave a few inches for plugging into the telephone wall jack. Press the wall mount bracket onto the telephone base until it clicks into place.

4. Put the corded handset aside. Press down the switch hook and remove the handset tab from the slot. Rotate the handset tab by 180 degrees. Press down the switch hook and then replace the handset tab to its slot.

Handset battery installation

Install the battery as shown below.

1. Plug the battery connector securely into the socket.

2. Place the battery with the label THIS SIDE UP facing up and the wires inside the battery compartment.

3. Slide the battery compartment cover towards the center of the handset until it clicks into place.

4. Place the handset in the handset charger to charge.

Handset battery charging

Once you have installed the battery, the screen indicates the battery status (see the table below). For best performance, keep the handset in the handset charger when not in use. The battery is fully charged after 11 hours of continuous charging.

<table>
<thead>
<tr>
<th>Battery indicators</th>

FIND HANDSET
Press to page all idle handsets when the telephone base is not in use.

Telephone base overview

CID
• Review the caller ID log when the telephone base is not in use.
• Scroll down while in a menu, or in the directory, caller ID log or redial list.
• Move the cursor to the left when entering numbers or names.

CANCEL
• Silence the ringer temporarily while the telephone base is ringing.
• Press and hold to erase the missed call indicator when the phone is not in use.
• Press to return to the previous menu, or press and hold to return to idle mode, without making changes.

FLASH
• Answer another incoming call during a call.

INT
• Start an intercom conversation or transfer a call.

FIND HANDSET
• Press to page all idle handsets when the telephone base is not in use.

MENU/SELECT
• Show the menu.
• While in a menu, press to select an item or save an entry or setting.

IN USE light
• On when the phone is in use, or when the answering system is answering an incoming call.
• On when a handset is being registered.
• Flashes when there is an incoming call.
• Flashes when handsets are being deregistered.
• Flashes when another telephone on the same line is in use.

X/DELETE
• Delete the playing message or announcement.
• Delete the displayed entry while in the directory, caller ID log or redial list.
• Delete digits or characters while using the dialling keys.

REPEAT
• Press once to repeat the playing message.
• Press twice to play the previous message.

MUTE
• Mute the microphone during a call.
• Silence the ringer temporarily while the handset is ringing.

/AUTO ANS ON/OFF
• Turn the built-in answering system on or off.

REDIAL/PAUSE
• Press repeatedly to review the redial list.
• Press and hold to insert a dialing pause while dialing or entering a number.
Handset overview

MENU/SELECT
- Show the menu.
- While in a menu, press to select an item or save an entry or setting.

OFF/CANCEL
- Hang up a call.
- Silence the ringer temporarily while the handset is ringing.
- Press and hold to erase the missed call indicator when the phone is not in use.
- Press to return to the previous menu, or press and hold to return to idle mode, without making changes.

CID/VOLUME
- Review the caller ID log when the phone is not in use.
- Increase the listening volume during a call or message playback.
- Scroll up while in a menu, or in the directory, caller ID log or redial list.
- Move the cursor to the right when entering numbers or names.

REDIAL/PAUSE
- Press repeatedly to review the redial list.
- Press and hold to insert a dialing pause while dialing or entering a number.
- Make or answer a call.
- Answer another incoming call during a call.

CHARGE light
- On when the handset is charging in the handset charger.

MUTE/DELETE
- Mute the microphone during a call.
- Delete digits or characters while using the dialling keys.
- Silence the ringer temporarily while the handset is ringing.
- Delete the displayed entry while in the directory, caller ID log or redial list.
- Press to delete the playing message or announcement.

INT
- Start an intercom conversation or transfer a call.

MIC
- Microphone.

Dialing keys
- Enter numbers or characters.
- Answer an incoming call.

TONE
- Switch to tone dialing temporarily during a call.

QUIET#
- Press and hold to set and turn on the quiet mode, or turn it off.
- Press repeatedly to show other dialing options when reviewing a caller ID log entry.

Dialing keys
- Make, answer or end a call using the handset speakerphone.
- During a call, press to switch between the speakerphone and the handset.

Press and hold to set or dial your voicemail number.

Use the Clr voicemail feature when the telephone indicates there is new voicemail but there is none. For example, when you have accessed your voicemail while away from home. The Clr voicemail feature only turns off the indicators; it does not delete your voicemail messages. As long as you have new voicemail messages, your telephone service provider continues to send the signal that turns on the indicators.

The following are some of the telephone features you may wish to set. Refer to Telephone settings in the online Complete user’s manual for detailed instructions on setting all telephone features.

Ringer volume
You can adjust the ringer volume level, or turn the ringer off.
1. Press MENU when the telephone base/cordless handset is not in use.
2. Scroll to Ringers then press SELECT twice.
3. Press \ or ▲ to adjust the volume, then press SELECT to save.
   - If the ringer volume is set to Off, the handset still rings when you press FIND HANDSET on the telephone base.

Set date and time
If you subscribe to caller ID service, the day, month and time are set automatically with each incoming call. You can also set the date and time manually.
1. Press MENU when the telephone base/cordless handset is not in use.
2. Scroll to Set date/time, then press SELECT.
3. Use the dialing keys (0-9) to enter the month (MM), date (DD) and year (YY), then press SELECT.
4. Use the dialing keys (0-9) to enter the hour (HH) and minute (MM). Then press \ or ▲ to choose AM or PM.
5. Press SELECT to save.

Quiet mode
You can turn on quiet mode for a period of time. During this period, all tones (except paging tone) and call screening are muted. When you turn on the quiet mode, the answering system turns on automatically.
1. Press and hold QUIET# when the telephone base/cordless handset is not in use.
2. Use the dialing keys (0-9) to enter the duration, then press SELECT to save.
   • To turn off the quiet mode, press and hold QUIET# when the telephone base/cordless handset is not in use.
Telephone operation

Make a call
Using a cordless handset:
• Press or then dial the telephone number.

Using the telephone base:
• Lift the corded handset or press /SPEAKER, then dial the telephone number.

Answer a call
Using a cordless handset:
• Press or any dialing key.

Using the telephone base:
• Lift the corded handset, or press /SPEAKER.

End a call
Using a cordless handset:
• Press FF or put the handset back in the handset charger.

Using the telephone base:
• When you are using the corded handset, place it back on the telephone base.
• When you are using the telephone base speakerphone, press /SPEAKER.

Speakerphone
Using a cordless handset:
• During a call, press to switch between speakerphone and normal handset use.

Using the telephone base:
• When you are using the corded handset, press /SPEAKER to switch to the base speakerphone.
• When you are using the base speakerphone, lift up the corded handset to switch to it.

Volume
To adjust the listening volume on a cordless handset:
• During a call, press \VOLUME or ▲VOLUME to adjust the listening volume.

To adjust the listening volume at the telephone base:
• During a call, press VOL or VOL ▲ to adjust the listening volume.

Mute
The mute function allows you to hear the other party but the other party cannot hear you.
1. During a call, press MUTE. The handset displays Muted. The telephone base displays Muted and MUTE light turns on.
2. Press MUTE again to resume the conversation.

Call waiting
When you subscribe to call waiting service from your telephone service provider, you hear an alert tone if there is an incoming call while you are on another call.
• Press FLASH to put the current call on hold and take the new call.
• Press FLASH at any time to switch back and forth between calls.

Temporary ringer silencing
When the telephone is ringing, you can temporarily silence the ringer of the telephone base/cordless handset without disconnecting the call. The next call rings normally at the preset volume.
• To silence the handset ringer, press OFF or MUTE on the handset. displays and Ringer muted displays briefly.
• To silence the telephone base ringer, press MUTE or CANCEL on the telephone base. displays and Ringer muted displays briefly.

Temporary tone dialing
If you have pulse (rotary) service only, you can switch from pulse to tone dialing temporarily during a call.
1. During a call, press TONE.
2. Use the dialing keys to enter the relevant number. The telephone sends touch-tone signals.
3. The telephone automatically returns to pulse dialing mode after you end the call.
Find handset

Use this feature to find all system handsets.

To start paging:

• Press FIND HANDSET on the telephone base and it displays "** Paging **". All idle handsets ring and display "** Paging **".

To end paging:

• Press FIND HANDSET on the telephone base.

Do not press and hold FIND HANDSET for more than four seconds. It may lead to handset deregistration.

Redial list

Each handset and the telephone base store the last 10 telephone numbers dialed. When there are already 10 entries, the oldest entry is deleted to make room for the new entry.

To review and dial a number from the redial list:

1. Press REDIAL when the telephone base/cordless handset is not in use.
2. Press ▼, ▲, or REDIAL repeatedly until the desired entry displays.
3. Press or □ to dial while using a cordless handset.

-OR-

Lift the corded handset or press /SPEAKER to dial while using the telephone base.

To delete a redial entry:

When the desired redial entry displays, press DELETE.

Chain dialing

Use this feature to initiate a dialing sequence from numbers stored in the directory, caller ID log or redial list while you are on a call. Chain dialing can be useful if you wish to access other numbers (such as bank account numbers or access codes) from the directory, caller ID log or redial list.

To access a number while on a call:

1. To enter the directory, press MENU/SELECT twice (only for cordless handsets).
2. To enter the caller ID log, press MENU, then scroll to Caller ID log, and then press SELECT (only for cordless handsets).
3. To enter the redial list, press REDIAL (for both cordless handsets and the telephone base).

-OR-

Scroll to the desired entry.

3. Press SELECT to dial the displayed number.

Join a call in progress

You can use the telephone base and a cordless handset, or two cordless handsets at a time on an outside call. You can buy additional expansion handsets (CS6609) for this telephone base. You can register up to five handsets to the telephone base.

• When a device is on a call, press or □ on another cordless handset, or lift the corded handset or press /SPEAKER on the telephone base.

• To exit the call, press OFF on the cordless handset or place it in the handset charger, or place the corded handset on the telephone base or press /SPEAKER on the telephone base. The call continues until all devices hang up.

Intercom

Use the intercom features for conversations between the telephone base and a cordless handset, or two cordless handsets.

1. Press INT on the telephone base/cordless handset when not in use. When you have more than one handset, use the dialing keys to enter a destination device number (7 for the telephone base, or 1 to 5 for HANDSET 1 to HANDSET 5).
2. To answer the intercom call with the destination handset, press or □, INT or any dialing key.

-OR-

To answer the intercom call with the telephone base, press /SPEAKER, INT, any dialing key or lift the corded handset.
3. To end an intercom call while using a cordless handset, press OFF or place the cordless handset back in the handset charger.

-OR-

To end an intercom call while using the telephone base, press /SPEAKER or INT when you are using the speakerphone, or return the corded handset to the telephone base.
Answer an incoming call during an intercom call

If you receive an outside call during an intercom call, there is an alert tone.

- To answer the outside call with a cordless handset, press \(\text{#}x\). The intercom call ends automatically.
- \(\text{OR}\) -
  - To answer the outside call with the telephone base, press \(\text{}#/\text{SPEAKER}\) twice. The intercom call ends automatically.
  - To end the intercom call without answering the outside call with a cordless handset, press \text{OFF}. The intercom call ends and the telephone continues to ring.
- \(\text{OR}\) -
  - To end the intercom call without answering the outside call with the telephone base, press \(\text{}#/\text{SPEAKER}\), or return the corded handset to the telephone base. The intercom call ends and the telephone continues to ring.

Call transfer using intercom

Use the intercom feature to transfer an outside call to another system device.

1. During a call, press \text{INT}. When you have more than one handset, use the dialing keys to enter a destination device number (7 for the telephone base, or 1 to 5 for \text{HANDSET 1 to HANDSET 5}).
2. To answer the intercom call with the destination handset, press \(\text{#}x\), \(\text{INT}\) or any dialing key.
- \(\text{OR}\) -
  - To answer the intercom call with the telephone base, press \(\text{}#/\text{SPEAKER}\), \(\text{INT}\), any dialing key or lift the corded handset.
  - The outside call is now on hold and both devices show \text{Intercom}. You can have a private conversation with the destination device.
3. From this intercom call, you have the following options:
   - You can press and hold \text{INT} on the original handset to let the destination device join you on the outside call in a three-way conversation.
   - You can press \text{INT} on the handset to switch between the outside call (Outside call displays) and the intercom call (Intercom displays).
   - To end the intercom call with the destination handset, press \text{OFF} or place the handset back in the handset charger.
- \(\text{OR}\) -
  - To end the intercom call with the destination telephone base, press \(\text{}#/\text{SPEAKER}\) or return the corded handset to the telephone base.
  - The outside call continues with the original system device.

Directory

The directory can store up to 50 entries which are shared by the telephone base and all system handsets.

To add a directory entry:

1. Press \text{MENU} on the cordless handset when the phone is not in use, or press \text{MENU} on the telephone base when no cordless handsets are in use.
2. Scroll to \text{Directory} then press \text{SELECT}.
3. Scroll to \text{Add contact} then press \text{SELECT}.
4. Use the dialing keys to enter the number (up to 30 digits).
- \(\text{OR}\) -
  - Copy a number from the redial list by pressing \text{REDIAL} and then press \(\text{\textdownarrow}, \text{\textup}, \text{\textdownarrow}\) or \text{REDIAL} repeatedly to select a number. Press \text{SELECT}.
5. Press \text{SELECT} to move to the name.
6. Use the dialing keys to enter the name (up to 15 characters). Additional key presses show other characters of that particular key.
7. Press \text{SELECT} to save.

While entering names and numbers, you can:

- Press \text{DELETE} to backspace and erase a digit or character.
- Press and hold \text{DELETE} to erase the entire entry.
- Press and hold \text{PAUSE} to insert a dialing pause (for entering phone numbers only).
- Press \(\text{\textdownarrow}, \text{\textup}\) to move the cursor to the left or right.
- Press \(\text{0}\) to add a space (for entering names only).

To review and dial from the directory:

Entries are sorted alphabetically.

1. Press \(\text{\textup}\) on the cordless handset when the phone is not in use, or press \(\text{\textup}\) on the telephone base when no cordless handsets are in use.
2. Scroll to browse through the directory, or use the dialing keys to start a name search.
3. To dial the displayed entry with the cordless handset, press \(\text{\textdownarrow}\) or \(\text{\textup}\).
- \(\text{OR}\) -
  - To dial the displayed entry with the telephone base, press \(\text{}#/\text{SPEAKER}\), or lift the corded handset.
To edit a directory entry:
1. When the desired entry displays, press SELECT.
2. Use the dialing keys to edit the number, then press SELECT.
3. Use the dialing keys to edit the name, then press SELECT to save.

To delete a directory entry:
1. When the desired entry displays, press DELETE.
2. When the screen displays Delete contact?, press SELECT.

Speed dial
You can copy up to 9 directory entries into the speed dial locations so that you can dial these numbers using fewer keys than usual.

To assign a speed dial entry:
1. Press MENU on the cordless handset when the phone is not in use, or press MENU on the telephone base when no cordless handsets are in use.
2. Scroll to Directory then press SELECT.
3. Scroll to Speed dial, then press SELECT.
4. Scroll to a desired speed dial location, then press SELECT.
5. Scroll to a desired directory entry, then press SELECT to save.

To dial a speed dial entry:
- Press and hold a dialing key (0 or 2-9) to dial the number stored in the corresponding location.

To delete a speed dial entry:
1. Press MENU on the cordless handset when the phone is not in use, or press MENU on the telephone base when no cordless handsets are in use.
2. Scroll to Directory then press SELECT.
3. Scroll to Speed dial, then press SELECT.
4. Scroll to a desired speed dial location, then press DELETE. The screen displays Clear SD #X? Press SELECT to confirm.

Caller ID
This product supports caller ID services provided by most telephone service providers. Depending on your service subscription, you may see the caller’s name, number, date and time of calls that are sent by your telephone service provider after the first or second ring.

Caller ID log
The caller ID log stores up to 50 entries. If you answer a call before the caller information appears, it will not be saved in the caller ID log.

- The telephone base/cordless handset displays XX missed calls when there are calls that have not been reviewed in the caller ID log.
- If you want to erase the missed call indicator, press and hold CANCEL when the telephone base/cordless handset is not in use.

To review and dial a number in the caller ID log:
1. Press CID on cordless handset when the phone is not in use, or press CID on the telephone base when no cordless handsets are in use.
2. Scroll to browse through the caller ID log. When the desired entry appears:
   - Press QUIET# repeatedly to show different dialing options.
   - Press 1 repeatedly if you need to add or remove in front of the phone number.
3. To dial the displayed number with a cordless handset, press or .
   - OR- To dial the displayed number with the telephone base, press SPEAKER, or lift the corded handset.

To save a caller ID log entry to the directory:
1. When the desired caller ID log entry displays, press SELECT.
2. Use the dialing keys to modify the number, then press SELECT.
3. Use the dialing keys to modify the name, then press SELECT to save.

To delete one caller ID log entry:
- When the desired caller ID log entry displays, press DELETE.

To delete all caller ID log entries:
1. Press MENU when the telephone base/cordless handset is not in use.
2. Scroll to Caller ID log and then press SELECT.
3. Scroll to Del all calls and then press SELECT twice.
About answering system and voicemail

Your telephone has separate indicators for two different types of voice messages: those left on its built-in digital answering system and those left with your telephone service provider’s voicemail. Each alerts you to new messages differently.

- If ♦/PLAY/STOP on the telephone base flashes, and XX new messages displays on the cordless handsets and telephone base, there are new messages in the built-in answering system. It can record up to 99 messages, depending on the length of each message. Each message can be up to 3 minutes in length. The total recording time is approximately 14 minutes.
- If ☎ and New voicemail display on the cordless handsets and the telephone base, your telephone service provider is indicating that it has new voicemail for you. Contact your telephone service provider for more information on how to access your voicemail.

Answering system settings

Default settings are indicated by asterisks (*).

<table>

</tbody>
</table>

Set number of rings

You can set the answering system to answer an incoming call after 2, 3, 4, 5 or 6 rings; or toll saver. If you choose toll saver, the answering system answers a call after 2 rings when you have new messages, or after 4 rings when you have no new messages.

1. Press MENU when the telephone base/cordless handset is not in use.
2. Scroll to ➤Answering sys then press SELECT.
3. Scroll to Ans sys setup then press SELECT.
4. Scroll to # of rings then press SELECT.
5. Press ▼ or ▲ to choose #6, #5, #4, #3, #2 or Toll saver and then press SELECT.

Record your own announcement

You can use the preset announcement to answer calls, or replace it with your own recorded announcement. The announcement can be up to 90 seconds in length.

1. Press MENU when the telephone base/cordless handset is not in use.
2. Press ▼ or ▲ to scroll to Answering sys then press SELECT twice.
3. The system announces, “To play, press 2. To record, press 7.” Then press 7 to record.
4. The system announces, “Record after the tone. Press 5 when you are done.” After the tone, speak towards the microphone.
5. Press 5 when done.

Answering system operation

Turn the answering system on or off

The answering system must be turned on to answer and record messages.

- Press ◐/ANS ON/OFF on the telephone base to turn the built-in answering system on or off.

Message playback at the telephone base

Press ➤/PLAY when the telephone base is not in use.

Options during playback:

- Press VOL ▲ or ▼ VOL to adjust the speaker volume.
- Press ♦/SKIP to skip to the next message.
- Press ◐/REPEAT to repeat the message currently playing. Press ◐/REPEAT twice to listen to the previous message.
- Press X/DELETE to delete the playing message. The system advances to the next message.
- Press ➤/STOP to stop.
Call intercept
If you want to talk to the person whose message is being recorded, press or on a cordless handset.

-OR-
Press or on the telephone base, or lift the corded handset from the telephone base.

Access the answering system remotely
1. Dial your telephone number from any touch-tone telephone.
2. When the system plays your announcement, enter the two-digit remote code. The preset code is 19.
3. You can enter one of the following remote commands.

<table>
<thead>
<tr>
<th>Command</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Play all messages.</td>
</tr>
<tr>
<td>2</td>
<td>Play only new messages.</td>
</tr>
<tr>
<td>3</td>
<td>Delete a message (during playback).</td>
</tr>
<tr>
<td>33</td>
<td>Delete all old messages.</td>
</tr>
<tr>
<td>4</td>
<td>Repeat the current message (during playback).</td>
</tr>
<tr>
<td>44</td>
<td>Repeat the previous message (during current message playback).</td>
</tr>
<tr>
<td>5</td>
<td>Stop.</td>
</tr>
<tr>
<td>*5</td>
<td>Hear a list of remote commands.</td>
</tr>
<tr>
<td>6</td>
<td>Skip to the next message (during playback).</td>
</tr>
<tr>
<td>*7</td>
<td>Record a new announcement.</td>
</tr>
<tr>
<td>8</td>
<td>End the call.</td>
</tr>
<tr>
<td>0</td>
<td>Turn the answering system on or off.</td>
</tr>
</tbody>
</table>

4. Hang up or press 8 to end the call.

Add and register a handset
The cordless handsets provided with your telephone system are already registered. Each handset is assigned a number that displays on the handset. Additional handsets registered to the telephone system are assigned numbers in the sequential order. This telephone system accommodates up to five handsets.

You can add new handsets (CS6609, purchased separately) to your telephone system. Each handset must be registered with the telephone base before use. When first purchased and properly charged, each expansion handset displays To register HS and See manual alternately. You may need to charge the handset before registering it to the telephone base.

To register a handset:
1. On the telephone base, press and hold FIND HANDSET for about four seconds until the IN USE light turns on and it shows Registering... 
2. On the cordless handset, press QUIET# then it shows Registering... Both the telephone base and cordless handset show Registered and you hear a beep when the registration process completes. The registration process takes about 60 seconds to complete.

Replace a handset
If you want to replace a handset or reassign the designated handset number of a registered handset, you must deregister all handsets and then individually register each handset.

To deregister all handsets:
1. Press and hold FIND HANDSET on the telephone base for about 10 seconds until the telephone base shows Registering... then De-register? The IN USE light flashes.
2. Immediately press and release MENU/SELECT. The telephone base displays Please wait.
3. All handsets show To register HS and See manual alternately when the deregistration process completes. The deregistration process takes about 10 seconds to complete.

Troubleshooting
If you have difficulty with your telephone, please try the suggestions below. For customer service, visit our website at www.vtechphones.com or call 1 (800) 595-9511. In Canada, go to www.vtechcanada.com or call 1 (800) 267-7377.

My telephone does not work at all.
• Make sure the battery is installed and charged correctly.
• Make sure the power adapter is securely plugged into an outlet not controlled by a wall switch.
• Make sure the telephone line cord is plugged firmly into the telephone base and the wall jack.
• Unplug the electrical power to the telephone base. Wait for approximately 15 seconds, then plug it back in. Allow up to one minute for the cordless handset and telephone base to synchronize.

• Charge the battery in the cordless handset for at least 11 hours. For optimum daily performance, return the cordless handset to the handset charger after use.

• If the battery is completely depleted, charge the cordless handset for at least 30 minutes before use.

• Remove and install the battery again. If that still does not work, it may be necessary to purchase a new battery.

• Disconnect the telephone base from the telephone wall jack and plug in a working telephone. If the other telephone does not work, the problem is probably in the wiring or telephone service. Contact your telephone service provider.

I cannot dial out.

• Try all the above suggestions.

• Make sure there is a dial tone before dialing. It is normal if the handset takes a second or two to synchronize with the telephone base before producing a dial tone. Wait an extra second before dialing.

• If other telephones in your home are having the same problem, the problem is in the wiring or telephone service. Contact your telephone service provider (charges may apply).

• Eliminate any background noise. Mute the cordless handset before dialing, or dial from another room in your home with less background noise.

I have accidentally set my cordless handset LCD language to Spanish or French, and I don’t know how to change it back to English.

While the phone is in idle mode or on a call, press MENU once on your cordless handset to enter the main menu. Then enter the code 364#.

The answering system does not record messages.

• Make sure the answering system is on.

• Make sure the memory of the answering system is not full. When the answering machine memory is full, it does not record new messages until some old messages are deleted.

• If you subscribe to voicemail service, change the number of ring so that your answering system answers before your voicemail answers. To determine how many rings activate your voicemail, contact your telephone service provider.

• If there is a fax machine connected to the same telephone line, try disconnecting the fax machine. If that solves the problem, consult your fax machine documentation for information on compatibility with answering systems.

The messages on the answering system are incomplete.

• If a caller leaves a very long message, part of it may be lost when the answering system disconnects the call after the preset recording time.

• If the memory on the answering system becomes full during a message, the answering system stops recording and disconnects the call.

• If a caller’s voice is very soft, the answering system may stop recording and disconnect the call.

• If the answering system does not record messages, press MENU once to enter the main menu. Then enter the code 364#.

The answering system stops recording and disconnects the call.

• Make sure the answering system stops recording and disconnects the call.

Common cure for electronic equipment.

• If the telephone is not responding normally, put the cordless handset in the handset charger. If this does not fix the problem, do the following (in the order listed):
  1. Disconnect the power to the telephone base.
  2. Disconnect the battery on the cordless handset.
  3. Wait a few minutes before connecting power to the telephone base.
  4. Install the battery again and place the cordless handset in the handset charger.
  5. Wait for the cordless handset to synchronize with the telephone base. Allow up one minute for this to take place.

Important safety instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

1. Read and understand all instructions.

2. Follow all warnings and instructions marked on the product.

3. Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

4. Do not use this product near water such as near a bath tub, wash bowl, kitchen sink, laundry tub or swimming pool, or in a wet basement or shower.

5. Do not place this product on an unstable table, shelf, stand or other unstable surfaces.

6. Slots and openings in the back or bottom of the telephone base and handset are provided for ventilation. To protect them from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiator or heat register. This product should not be placed in any area where proper ventilation is not provided.

7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home or office, consult your dealer or local power company.

8. Do not allow anything to rest on the power cord. Do not install this product where the cord may be walked on.

9. Never push objects of any kind into this product through the slots in the telephone base or handset because they may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product.

10. To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Opening or removing parts of the telephone base or handset other than specified access doors may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the product is subsequently used.

11. Do not overload wall outlets and extension cords.
12. Unplug this product from the wall outlet and refer servicing to an authorized service facility under the following conditions:
- When the power supply cord or plug is damaged or frayed.
- If liquid has been spilled onto the product.
- If the product has been exposed to rain or water.
- If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operation instructions. Improper adjustment of other controls may result in damage and often requires extensive work by an authorized technician to restore the product to normal operation.
- If the product has been dropped and the telephone base and/or handset has been damaged.
- If the product exhibits a distinct change in performance.
13. Avoid using a telephone (other than cordless) during an electrical storm. There is a remote risk of electric shock from lightning.
14. Do not use the telephone to report a gas leak in the vicinity of the leak. Under certain circumstances, a spark may be created when the adapter is plugged into the power outlet, or when the handset is replaced in its cradle. This is a common event associated with the closing of any electrical circuit. The user should not plug the phone into a power outlet, and should not put a charged handset into the cradle, if the product has been exposed to rain or water. In an environment containing concentrations of flammable or flame-supporting gases, unless there is adequate ventilation. A spark in such an environment could create a fire or explosion. Such environments might include: medical use of oxygen without adequate ventilation; industrial gases (cleaning solvents; gasoline vapors; etc.); a leak of natural gas; etc.
15. Only plug the handset of your telephone next to your ear when it is in normal talk mode.
16. The cordless handset is intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.

SAV E THE S INSTRUCTIONS

Precautions for users of implanted cardiac pacemakers
Cardiac pacemakers (applies only to digital cordless telephones):

- Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless telephones and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians that:
  - Pacemaker patients
    - Should keep wireless telephones at least six inches from the pacemaker.
    - Should NOT place wireless telephones directly over the pacemaker, such as in a breast pocket, when it is turned ON.
    - Should use the wireless telephone at the ear opposite the pacemaker. WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless telephones.

Operating range
This cordless telephone operates with the maximum power allowed by the Federal Communications Commission (FCC). Even so, this handset and telephone base can communicate over only a certain distance - which can vary with the locations of the telephone base and handset, the weather, and the layout of your home or office.

When the handset is out of range, the handset displays Out of range or no pwr at base.
- If there is a call while the handset is out of range, it may not ring, or if it does ring, the call may not connect well when you press to answer the call.
- If the handset moves out of range during a telephone conversation, there may be interference. To improve reception, move closer to the telephone base.

ECO mode
This power conserving technology reduces power consumption for optimal battery performance, according to the distance between the telephone base and the cordless handset. When the telephone base communicates with the cordless handset, ECO mode will be activated automatically.

Maintenance
Taking care of your telephone
Your cordless telephone contains sophisticated electronic parts, so it must be treated with care.

- Avoid rough treatment
- Place the handset down gently. Save the original packing materials to protect your telephone if you ever need to ship it.

Avoid water
Your telephone can be damaged if it gets wet. Do not use the handset outdoors in the rain, or handle it with wet hands. Do not install the telephone base near a sink, bathtub or shower.

Electrical storms
Electrical storms can sometimes cause power surges harmful to electronic equipment. For your own safety, take caution when using electrical appliances during storms.

Cleaning your telephone
Your telephone has a durable plastic casing that should retain its luster for many years. Clean it only with a soft cloth slightly dampened with water or mild soap. Do not use excess water or cleaning solvents of any kind.

Remember that electrical appliances can cause serious injury if used when you are wet or standing in water. If the telephone base should fall into water, DO NOT RETRIEVE IT UNTIL YOU UNPLUG THE POWER CORD AND TELEPHONE LINE CORD FROM THE WALL. Then remove the telephone by the unplugged cords.

About cordless telephones
- Privacy: The same features that make a cordless telephone convenient create some limitations. Telephone calls are transmitted between the telephone base and the cordless handset by radio waves, so there is a possibility that the cordless telephone conversations could be intercepted by radio receiving equipment within range of the cordless handset. For this reason, you should not think of cordless telephone conversations as being as private as those on corded telephones.
- Electrical power: The telephone base of this cordless telephone must be connected to a working electrical outlet. The electrical outlet should not be controlled by a wall switch. Calls cannot be made from the cordless telephone if the telephone base is unplugged, switched off or if the electrical power is interrupted.
- Potential TV interference: Some cordless telephones operate at frequencies that may cause interference to televisions and VCRs. To minimize or prevent such interference, do not place the telephone base of the cordless telephone near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR often reduces or eliminates the interference.
- Rechargeable batteries: Exercise care in handling batteries in order not to create a short circuit with conducting material such as rings, bracelets, and keys. The battery or conductor may overheat and cause harm. Observe proper polarity between the battery and the battery charger.
- Nickel-metal hydride rechargeable batteries: Dispose of these batteries in a safe manner. Do not burn or puncture the battery. Like other batteries of this type, if burned or punctured, they could release caustic material which could cause injury.

14
What must you return with the Product to get warranty service?

1. Return the entire original package and contents including the Product to the VTech service location along with a description of the malfunction or difficulty; and
2. Include a “valid proof of purchase” (sales receipt) identifying the Product purchased (Product model) and the date of purchase or receipt; and
3. Provide your name, complete and correct mailing address, and telephone number.

How do you get warranty service?

To obtain warranty service in the USA, please visit our website at www.vtechphones.com or call 1 (800) 595-9511. In Canada, go to www.vtechcanada.com or call 1 (800) 267-7377.

NOTE: Before calling for service, please review the user’s manual - a check of the Product’s controls and features may save you a service call.

How long is the limited warranty period?

The limited warranty period for the Product extends for ONE (1) YEAR from the date of purchase. If VTech repairs or replaces a Materi­ally Defective Product under the terms of this limited warranty, this limited warranty also applies to any repaired or replaced Product for a period of either (a) 90 days from the date the repaired or replaced Product is shipped to you or (b) the time remaining on the original one-year warranty; whichever is longer.

What is not covered by this limited warranty?

This limited warranty does not cover:

1. Product that has been subjected to misuse, accident, shipping or other physical damage, improper installation, abnormal operation or handling, neglect, inundation, fire, water or other liquid intrusion; or
2. Product that has been damaged due to modification or alteration by anyone other than an authorized service representative of VTech; or
3. Product to the extent that the product experienced is caused by signal conditions, network reliability, or interference with antenna systems; or
4. Product to the extent that the problem is caused by use with non-VTech accessories; or
5. Product whose warranty/quality stickers, product serial number plates or electronic serial numbers have been removed, altered or rendered illegible; or
6. Product returned without a valid proof of purchase (see item 2 below); or
7. Charges for installation or set up, adjustment of customer controls, and installation or repair of systems and components that VTech did not provide; or
8. Product purchased, used, serviced, or shipped for repair from outside the United States of America or Canada, or used for commercial or institutional purposes (including but not limited to Products used for rental purposes); or
9. Product returned after the expiration of the limited warranty period.

What will VTech do if the Product is not free from defects in materials and workmanship during the limited warranty period ("Materi­ally Defective Product")?

During the limited warranty period, VTech’s authorized service representative will repair or replace at VTech’s option, without charge, a Materi­ally Defective Product. If we repair the Product, we may use new or refurbished replacement parts. If we choose to replace the Product, we may replace it with a new or refurbished Product of the same or similar design. We will retain defective parts, modules, or equipment.

Repair or replacement of the Product, at VTech’s option, is your exclusive remedy. VTech will return the repaired or replacement Products to you in working condition. You should expect the repair or replacement to take approximately 30 days.

How will VTech do if the Product is not free from defects in materials and workmanship during the limited warranty period ("Materi­ally Defective Product")?

VTech will repair or replace a Materi­ally Defective Product under the terms of this limited warranty in one of two ways:

1. We will repair the Materi­ally Defective Product at no charge to you. We may use new or refurbished or remanufactured replacement parts when making a repair.
2. We will replace the Materi­ally Defective Product at no charge to you. We may replace it with a new or refurbished Product of the same or similar design. We will retain defective parts, modules, or equipment.

If we choose to replace the Product, we may replace it with a new or refurbished Product of the same or similar design. We will retain defective parts, modules, or equipment.

How will VTech do if the Product is not free from defects in materials and workmanship during the limited warranty period ("Materi­ally Defective Product")?

This limited warranty exclusively describes all of VTech’s responsibilities regarding the Product. There are no other express warranties. No one is authorized to make modifications to this limited warranty and you should not rely on any such modification.

What is the RBRC® seal on the nickel-metal hydride battery indicates that VTech Communications, Inc. is voluntarily participating in an industry program to collect and recycle these batteries at the end of their useful lives, when taken out of service within the United States and Canada. The RBRC® program provides a convenient alternative to placing used nickel-metal hydride batteries into the trash or municipal waste, which may be illegal in your area.

VTech’s participation in RBRC® makes it easy for you to drop off the spent battery at local retailers participating in the RBRC® program or at authorized VTech product service centers. Please call 1 (800) 8 BATTERY® (for information on Ni-MH battery recycling and disposal bans/restrictions in your area. VTech’s involvement in this program is part of its commitment to protecting our environment and conserving natural resources.

Limited warranty

What does this limited warranty cover?

The manufacturer of this VTech Product warrants to the holder of a valid proof of purchase (“Consumer” or “you”) that the Product and all accessories provided in the sales package (“Product”) are free from defects in material and workmanship, pursuant to the following terms and conditions, when installed and used normally and in accordance with the Product operating instructions. This limited warranty extends only to the Consumer for Products purchased and used in the United States of America and Canada.

What will VTech do if the Product is not free from defects in materials and workmanship during the limited warranty period ("Materi­ally Defective Product")?

This limited warranty exclusively describes all of VTech’s responsibilities regarding the Product. There are no other express warranties. No one is authorized to make modifications to this limited warranty and you should not rely on any such modification.

What is not covered by this limited warranty?

This limited warranty does not cover:

1. Product that has been subjected to misuse, accident, shipping or other physical damage, improper installation, abnormal operation or handling, neglect, inundation, fire, water or other liquid intrusion; or
2. Product that has been damaged due to modification or alteration by anyone other than an authorized service representative of VTech; or
3. Product to the extent that the problem experienced is caused by signal conditions, network reliability, or interference with antenna systems; or
4. Product to the extent that the problem is caused by use with non-VTech accessories; or
5. Product whose warranty/quality stickers, product serial number plates or electronic serial numbers have been removed, altered or rendered illegible; or
6. Product purchased, used, serviced, or shipped for repair from outside the United States of America or Canada, or used for commercial or institutional purposes (including but not limited to Products used for rental purposes); or
7. Product returned without a valid proof of purchase (see item 2 below); or
8. Charges for installation or set up, adjustment of customer controls, and installation or repair of systems and components that VTech did not provide; or
9. Product returned after the expiration of the limited warranty period.

What will VTech do if the Product is not free from defects in materials and workmanship during the limited warranty period ("Materi­ally Defective Product")?

This limited warranty does not cover:

1. Product that has been subjected to misuse, accident, shipping or other physical damage, improper installation, abnormal operation or handling, neglect, inundation, fire, water or other liquid intrusion; or
2. Product that has been damaged due to modification or alteration by anyone other than an authorized service representative of VTech; or
3. Product to the extent that the problem experienced is caused by signal conditions, network reliability, or interference with antenna systems; or
4. Product to the extent that the problem is caused by use with non-VTech accessories; or
5. Product whose warranty/quality stickers, product serial number plates or electronic serial numbers have been removed, altered or rendered illegible; or
6. Product purchased, used, serviced, or shipped for repair from outside the United States of America or Canada, or used for commercial or institutional purposes (including but not limited to Products used for rental purposes); or
7. Product returned without a valid proof of purchase (see item 2 below); or
8. Charges for installation or set up, adjustment of customer controls, and installation or repair of systems outside the unit.

How do you get warranty service?

To obtain warranty service in the USA, please visit our website at www.vtechphones.com or call 1 (800) 595-9511. In Canada, go to www.vtechcanada.com or call 1 (800) 267-7377.

NOTE: Before calling for service, please review the user’s manual - a check of the Product’s controls and features may save you a service call. Except as provided by applicable law, you assume the risk of loss or damage during transit and transportation and are responsible for delivery or handling charges incurred in the transport of the Product(s) to the service location. You must keep your original sales receipt to obtain warranty service. You must pay for the cost of repair and return shipping costs for the repair of Products that are not covered by this limited warranty.

What must you return with the Product to get warranty service?

1. Return the entire original package and contents including the Product to the VTech service location along with a description of the malfunction or difficulty; and
2. Include a “valid proof of purchase” (sales receipt) identifying the Product purchased (Product model) and the date of purchase or receipt; and
3. Provide your name, complete and correct mailing address, and telephone number.

Other limitations

This warranty is the complete and exclusive agreement between you and VTech. It supersedes all other written or oral communications related to this Product. VTech provides no other warranties for this Product.

Provide your name, complete and correct mailing address, and telephone number.

Include a “valid proof of purchase” (sales receipt) identifying the Product purchased (Product model) and the date of purchase or receipt; and

Provide your name, complete and correct mailing address, and telephone number.

This warranty exclusively describes all of VTech’s responsibilities regarding the Product. There are no other express warranties. No one is authorized to make modifications to this limited warranty and you should not rely on any such modification.

State/Provincial Law Rights: This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state or province to province.

Limitations: Implied warranties, including those of fitness for a particular purpose and merchantability (an unwritten warranty that the Product is fit for ordinary use) are limited to one year from the date of purchase. Some states/provinces do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. In no event shall VTech be liable for any indirect, special, incidental, consequential, or similar damages (including, but not limited to lost profits or revenue, inability to use the Product or other associated equipment, the cost of substitute equipment, and claims by third parties) resulting from the use of this Product. Some states/provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Please retain your original sales receipt as proof of purchase.

The RBRC® seal on the nickel-metal hydride battery indicates that VTech Communications, Inc. is voluntarily participating in an industry program to collect and recycle these batteries at the end of their useful lives, when taken out of service within the United States and Canada. FCC, ACTA and IC regulations

FCC Part 15
This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Privacy of communications may not be ensured when using this telephone.

To ensure safety of users, the FCC has established criteria for the amount of radio frequency energy that can be handled by the user or bystander according to the intended usage of the product. This product has been tested and found to comply with the FCC criteria. The handset may be safely held against the ear of the user. The handset shall be installed with a base that parts of the user’s body other than the hands are maintained at a distance of approximately 20 cm (8 inches) or more.

This Class B digital apparatus complies with Canadian ICES-003.

FCC Part 68 and ACTA
This equipment complies with Part 68 rules and with technical requirements adopted by the Administrative Council for Terminal Attachments (ACTA). The label on the back or bottom of this equipment contains, among other things, a product identifier in the format US:AAAEQ##TXXXX. This identifier must be provided to your telephone service provider upon request.

The plug and jack used to connect this equipment to premises wiring and the telephone network must comply with applicable Part 68 rules and technical requirements adopted by ACTA. A compliant telephone cord and modular plug is provided with this equipment as a means of connecting the equipment to the user’s premises wiring. The Ringer Equivalence Number (REN) for this equipment is 0.0. The REN is an indication of the maximum number of devices allowed to be connected to a telephone interface. The sum of the RENs of all the devices does not exceed five.

The term “IC:” before the certification/registration number only signifies that the Industry Canada technical specifications were met.

This product meets the applicable Industry Canada technical specifications. The term “IC:” before the certification/registration number only signifies that the Industry Canada technical specifications were met.

This equipment is hearing aid compatible. If you have a specially wired alarm dialing equipment connected to your telephone line, ensure the connection of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone service provider. If this product is equipped with a corded or cordless handset, it is hearing aid compatible.

If this equipment is malfunctioning, it must be unplugged from the modular jack until the problem has been corrected. Repairs to this telephone equipment can only be made by the manufacturer or its authorized agents. For repair procedures, follow the instructions outlined under the Limited warranty.

If this equipment is causing harm to the telephone network, the telephone service provider may temporarily discontinue your telephone service. The telephone service provider is required to notify you before interfering service. If advance notice is not practical, you will be given the opportunity to correct the problem and the telephone service provider is required to inform you of your right to file a complaint with the FCC. Your telephone service provider may make changes in its facilities, equipment, operation, or procedures that could affect the proper functioning of this product. The telephone service provider is required to notify you if such changes are planned. If this product is equipped with a corded or cordless handset, it is hearing aid compatible.

If you make or receive memory dialing locations, you may choose to store emergency telephone numbers (e.g., police, fire, medical) in these locations. If you do store or test emergency numbers, please:

- Remain on the line and briefly explain the reason for the call before hanging up.
- Perform such activities in off-peak hours, such as early morning or late evening.

Industry Canada
Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

The term “IC:” before the certification/registration number only signifies that the Industry Canada technical specifications were met.

The Ringer Equivalence Number (REN) for this terminal equipment is 0. The REN is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

This product meets the applicable Industry Canada technical specifications.
