What's in the box

Install the battery

You can power up the parent unit by connecting it to AC power or to the rechargeable battery provided. Even if the parent unit is connected to AC power, we recommend you also install the battery. This guarantees continual operation in case of a power outage.

• Use only the battery supplied with this product.

Install the battery as shown below.

Control key panel

Press to enter the menu while idle.

item, or save a setting.

While in a menu, press to choose an

 Make sure the supplied rechargeable battery with the label THIS SIDE UP facing up.

Replace the battery

To replace the battery, unplug the battery connector from the socket, and then pull the battery out of the battery compartment. Follow the steps above to install the battery.

ØNOTES

- · The operating time for using the rechargeable battery is short. If you want to monitor your baby for a long time, we recommend you connect the parent
- · If the parent unit will not be used for a long time, disconnect and remove the battery to prevent possible leakage.

Connect and charge the battery

ONOTES

- · Use only the parent unit power adapter or the baby unit power adapter supplied with this product.
- Make sure the electrical outlets are not controlled by wall switches
- The parent unit power adapter and baby unit power adapter are intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.
- Make sure the parent unit, the baby unit and the power adapter cord are out of reach of children.

Connect the baby monitor

Charge the parent unit battery

Once you have connected the parent unit and installed its battery, it powers on automatically. The battery icon indicates the battery status (see the following table).

ONOTES

- The parent unit battery is fully charged after 11 hours of continuous charging.
- It takes longer to charge the battery when the parent unit is turned on. To shorten the charging time, turn the parent unit off while charging.
- The standby time varies depending on the sensitivity level you set, your actual use and the age of the battery

Dottom: Dottom: Action

The battery icon is off.	No battery is installed. The parent unit can be used only when it is connected to AC power.	Install the parent unit battery. Charge without interruption (at least 30 minutes).		
LOW BATTERY and C flash on the screen. The flight flashes.	The battery has very little charge and may be used for only a short time.	Charge without interruption (about 30 minutes).		
The battery icon becomes solid .	The battery is fully charged.	To keep the battery charged, connect it to AC power when not in use.		

Before use

ØNOTE

This baby monitor is intended as an aid. It is not a substitute for proper adult supervision, and should not be used as such

You may test the baby monitor before initial use, and at regular times thereafter

Place the parent unit and the baby unit in he same room to test the product.

Test your audio monitor

 Speak towards the microphone of the baby unit. You will hear the sound at the parent unit, and see the visual sound indicators light up.

Positioning the baby monitor (CAUTION

- Keep the baby unit out of the reach of the baby. Never place or mount the baby unit inside the baby's crib or playpen.
- Do not expose the baby unit to extreme heat or direct sunlight. 1. Place the baby unit at least 1 meter / 3 feet
- away from your baby.

- · If you experience audio feedback on either the parent unit or baby unit, move the parent unit further away until there is no more audio feedback; or press volume - on the parent unit to lower the audio feedback sound.
- 2. Place the parent unit at least 1 meter / 3 feet away from the baby unit.

- Increase the speaker volume of the parent unit if you cannot hear the sounds transmitted from the
- 3. Press 😌 on the baby unit to turn on the projector. It projects some colorful images to the environment. Adjust the angle of the baby unit so that the images are clearly projected to the ceiling or a wall.

Operating range

The operating range of the baby monitor is up to 300 meters (1,000 feet) outdoors or 50 meters (160 feet) indoors. The actual operating range may vary depending on the environmental conditions, and other interferences such as walls, doors, and other obstructions.

1	Projector

confirm your selection. You hear a confirmation

Projector and lullaby

You can turn on the projector and lullaby on the baby unit. The baby unit projects colorful images to the environment, and plays the lullaby to comfort your baby.

When the projector is turned on, grain displays on the parent unit screen. The baby unit will play lullaby.

- Press once to turn on the projector and play lullaby. The interesting and colorful images is projected at the same time.
- Press again to stop playing the lullaby. The baby unit keeps projecting the colorful
- Press for a third time to turn off the projector. The interesting and colorful images fade out.

ØNOTES

- · The projector and lullaby will automatically turn off after 15 minutes
- We recommend you not to turn on the vibration alert and the Jullaby at the same time, as the Juliaby will trigger the vibration alert frequently.
- If the baby unit receives talkback from the parent unit during lullaby playback, the lullaby will be paused. It resumes after the talkback finishes.

Talk to the baby unit

You can broadcast messages from a parent unit to the baby unit and the other parent unit. If you have two parent units, you can use both of them at the same time to talk to the baby unit

 Press and hold talk on the side of the parent unit. The screen displays TALK when the voice connection to the baby unit is made. Speak towards the **mic** on the parent unit. Your voice is broadcast to the baby unit and the other parent unit.

ØNOTES

- If the speaker volume of the parent unit is set to VOLUME OFF, it will be reset to the default **VOLUME 3** when you press and hold **TALK**.
- When a parent unit is talking to the baby unit, it is also broadcast to the other parent unit. However, sounds from the baby unit cannot be transmitted to the parent units at the moment

Find/page the parent unit

Use this feature to find misplaced parent units. Press **page** on the baby unit. All idle parent

- units ring and display **PAGING**.
- 2. To end paging, press any key on the parent unit, or press **page** on the baby unit.

- Paging rings all parent units even if the speaker volume of parent unit is set to **VOLUME OFF**.
- The baby unit cannot page any parent unit that is turned off, out of range or talking to the baby unit.

General product care

To keep this product working well and looking good, follow these guidelines:

- Avoid putting it near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps)
- DO NOT expose it to direct sunlight or moisture. Avoid dropping the product or treating it roughly.
- Clean with a soft cloth.
- DO NOT immerse the parent unit and the baby
- unit in water and do not clean them under the tap. DO NOT use cleaning spray or liquid cleaners.
- Make sure the baby unit and parent unit are dry before you connect them to the mains again.

Storage

When you are not going to use the baby monitor for some time, remove the rechargeable battery from the parent unit. Store the parent unit, the baby unit and the adapters in a cool and dry place

Frequently asked questions

Below are the questions most frequently asked about the baby monitor. If you cannot find the answer to your question, visit our website at www.vtechphones.com or call 1 (800) 595-9511 for customer service.

Why does the Try the following (in the order

baby monitor	listed) for common cure:					
not respond normally?	Disconnect the power to the baby unit and the parent units.					
	Remove the batteries in the parent units. Then, install the batteries again.					
	Wait a few minutes before connecting power back to the baby units and the parent unit.					
	Turn on the baby unit and the parent units.					
	Wait for the parent units to synchronize with the baby unit. Allow up to one minute for this to take place.					
Why doesn't the screen of the parent unit go on when I switch on the unit?	Perhaps the rechargeable battery of the parent unit is empty and the parent unit is not connected to the mains. Insert the appliance plug into the parent unit and put the adapter in a wall socket.					
Why doesn't the power on light of the baby unit go on when I switch on the unit?	Perhaps the baby unit is not connected to the mains. Connect the baby unit to the mains.					
Why does the baby monitor produce a high-pitched noise?	The units may be too close to each other. Make sure the parent unit and the baby unit are at least 1 meter/3 feet away from each other.					
Why does the parent unit react	The baby unit also detects other sounds than those of your baby.

When using your equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

- 1. Follow all warnings and instructions marked on the product.
- Adult setup is required.
- 3. This product is intended as an aid. It is not a substitute for responsible and proper adult supervision and should not be used as such.
- 4. This product is not intended for use as a medical monitor.
- . Do not use this product near water. For example, do not use it next to a bath tub, wash bowl, kitchen sink, laundry tub or swimming pool, or in a wet basement or shower
- 6. CAUTION: Use only the batteries indicated in this manual. There may be a risk of explosion

if a wrong type of battery is used for the parent unit. Use only the supplied rechargeable battery or replacement battery pack (BT166342/ BT266342) for the parent unit. Do not dispose of batteries in a fire. They may explode. Dispose of used battery according to the information in The RBRC® seal.

- 7. Use only the adapters included with this product. Incorrect adapter polarity or voltage can seriously damage the product. Baby unit power adapter: Input 100-120V AC 150mA 60Hz; Output: 6V DC 600mA; Parent unit power adapter: Input 100-120V AC 150mA 60Hz; Output: 6V DC 400mA.
- 8. The power adapters are intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet
- 9. For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily accessible
- 10.Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
- 11. Unplug the power cords before replacing batteries.
- 12.Do not cut off the power adapters to replace them with other plugs, as this causes a hazardous situation
- 13.Do not allow anything to rest on the power cords. Do not install this product where the cords may be walked on or crimped.
- 14. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home, consult your dealer or local power company.
- 15.Do not overload wall outlets or use an extension cord.
- 16.Do not place this product on an unstable table, shelf, stand or other unstable surfaces.
- 17. This product should not be placed in any area where proper ventilation is not provided Slots and openings in the back or bottom of this product are provided for ventilation. To protect them from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiator or heat register.
- 18. Never push objects of any kind into this product through the slots because they may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product.

19.To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Opening or removing parts of the product other than specified access doors may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the product is subsequently used

- 20. You should test the sound reception every components
- be picked up by other nursery monitors. cordless phones, scanners, etc.
- 23. Children should be supervised to ensure that they do not play with the product.
- persons (including children) with reduced physical, sensory or mental capabilities. or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

SAVE THESE INSTRUCTIONS

Cautions

- 1. Use and store the product at a temperature between 32°F and 104°F
- Do not expose the product to extreme cold, heat or direct sunlight. Do not put the product close to a heating source.
- cord(s) are always out of reach of the baby. at least 3 feet away from the baby or crib, to avoid a possible strangulation hazard. 5. Never place the baby unit(s) inside the
- baby's crib or playpen. Never cover the baby towel or a blanket
- interference with your baby monitor. Try installing your baby monitor as far away from these electronic devices as possible: wireless routers, radios, cellular telephones. intercoms, room monitors, televisions, personal computers, kitchen appliances and cordless telephones.

Precautions for users of implanted cardiac pacemakers

Cardiac pacemakers (applies only to digital cordless devices):

Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless devices and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians that:

Pacemaker patients

- Should keep wireless devices at least six inches from the pacemaker
- Should NOT place wireless devices directly over the pacemaker, such as in a breast pocket, when it is turned ON.

WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless devices.

Electromagnetic fields (EMF)

This VTech product complies with all standards regarding electromagnetic fields (EMF). If handled properly and according to the instructions in this user's manual, the product is safe to be used based on scientific evidence available today.

The RBRC® seal

The RBRC® seal on the nickel-metal battery indicates that VTech Communications, Inc. is voluntarily participating in an industry program to collect and recycle these batteries at the end of their useful lives, when taken out of service within the United States and Canada.

The RBRC® program provides a convenient alternative to placing used nickel-metal batteries into the trash or municipal waste, which may be illegal in your area. VTech's participation in RBRC® makes it easy for you to drop off the spent battery at local retailers participating in the RBRC® program or at authorized VTech product service centers. Please cal 1 (800) 8 BATTERY® for information on Ni-MH battery

recycling and disposal bans/restrictions in your area. VTech's involvement in this program is part of its commitment to protecting our environment and conserving natural resources.

FCC and IC regulations

FCC Part 15

This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna. Increase the separation between the equipment
- and receiver. Connect the equipment into an outlet on a circuit
- different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV
- technician for help

Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

To ensure safety of users, the FCC has established criteria for the amount of radio frequency energy that can be safely absorbed by a user or bystander according to the intended usage of the product. This product has been tested and found to comply with the FCC criteria. The baby unit shall be installed and used such that parts of all persons' body are maintained at a distance of approximately 8 in (20 cm) or more The transmitter and antenna of the parent unit shall be held at least 1 in (2.5 cm) from your face.

This Class B digital apparatus complies with Canadian CAN ICES-3 (B)/NMB-3(B)

Industry Canada

This device complies with Industry Canada licenceexempt RSS standard(s).

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference, including interference that may cause undesired operation. The term "IC:" before the certification/registration

number only signifies that the Industry Canada technical specifications were met. This product meets the applicable Industry Canada technical specifications.

RF radiation exposure statement

The baby unit complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The baby unit should be installed and operated with a minimum distance of 8 in (20 cm) between the baby unit and all persons' body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment complies also with Industry Canada RSS-102 with respect to Canada's Health Code 6 for Exposure of Humans to RF Fields.

California Energy Commission attery charging testing mode

This baby monitor meets the California Energy Commission (CEC) regulations for energy consumption Your baby monitor is set up to comply with the energyconserving standards right out of the box

activated while charging Even if the parent unit is paired to baby units, the CEC battery charging testing mode is activated while it is powered off and charging.

Follow the instructions to install and charge the

battery. The CEC battery charging testing mode is

Avis aux détenteurs de stimulateurs cardiaques

- · Vous devriez maintenir les dispositifs sans fil à au moins six pouces du simulateur cardiaque.
- Ils ne doivent PAS placer le téléphone sans fil directement sur le stimulateur cardiaque, tel que dans une poche de chemise, lorsque celui-ci est

L'étude effectuée par l'organisme WRS n'a pas identifié de risque pour les détenteurs de simulateurs cardiaques causés par les gens qui utilisent dispositifs sans fil à proximité de ceux-ci.

Champs électromagnétiques (EMF)

Ce produit de VTech est conforme à toutes les normes se rapportant aux champs électromagnétiques (EMF) standard. Si vous le manipulez correctement en suivant les instructions de ce quide, son utilisation sera sécuritaire pendant de nombreuses années, selon les meilleures évidences scientifiques dont nous disposons aujourd'hui.

Limited warranty

What does this limited warranty cover?

The manufacturer of this VTech Product warrants to the holder of a valid proof of purchase ("Consumer" or "you") that the Product and all accessories provided in the sales package ("Product") are free from defects in material and workmanship, pursuant to the following terms and conditions, when installed and used normally and in accordance with the Product operating instructions. This limited warranty extends only to the Consumer for Products purchased and used in the

What will VTech do if the Product is not free from defects in materials and workmanship during the limited warranty period ("Materially Defective

United States of America and Canada

Product")?

During the limited warranty period, VTech's authorized service representative will repair or replace at VTech's option, without charge, a Materially Defective Product. If we repair the Product, we may use new or refurbished replacement parts. If we choose to replace the Product, we may replace it with a new or refurbished Product of the same or similar design. We will retain defective parts, modules, or equipment Repair or replacement of the Product, at VTech's option, is your exclusive remedy. VTech will return the repaired or replacement Products to you in working condition. You should expect the repair or replacement to take approximately 30 days.

How long is the limited warranty period?

The limited warranty period for the Product extends for ONE (1) YEAR from the date of purchase. If VTech repairs or replaces a Materially Defective Product under the terms of this limited warranty, this limited warranty also applies to the repaired or replacement Product for a period of either (a) 90 days from the date the repaired or replacement Product is shipped to you or (b) the time remaining on the original one-year warranty; whichever is longer.

What is not covered by this limited warranty? This limited warranty does not cover:

- 1. Product that has been subjected to misuse, accident, shipping or other physical damage, improper installation, abnormal operation or handling, neglect, inundation, fire, water or other liquid intrusion; or Product that has been damaged due to repair, alteration or modification by anyone other than an
