VM981

VTech Wi-Fi HD Video Monitor allows you to stay close to your baby when you are on the move or away. This monitor is Wi-Fi enabled, which uses your home wireless network to stream live video and audio through the HD camera unit and 5-inch touch screen parent unit. It allows you to maintain a constant connection to your baby.

You can also monitor from your smartphone and mobile tablet. VTech Wi-Fi HD Video Monitor uses MyVTech Baby app to let you instantly see and hear what's happening with your baby from anywhere in the world. The app can be downloaded from the App Store or the Google Play™ Store, directly from your smartphone or mobile tablet.

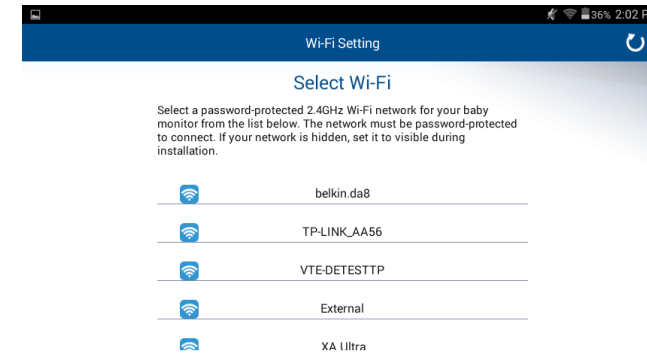

Quick start guide

1 Set up Wi-Fi connection

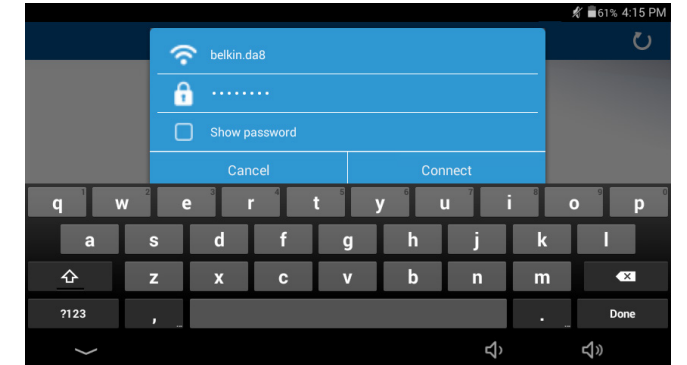

1 After the parent unit is fully charged, power on the parent unit.

2 Tap to select your preferred and secured Wi-Fi network with good signal strength.

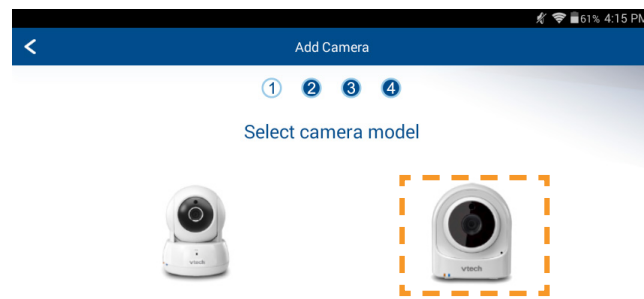

3 Type in the password of the Wi-Fi network, and then tap **Connect**.

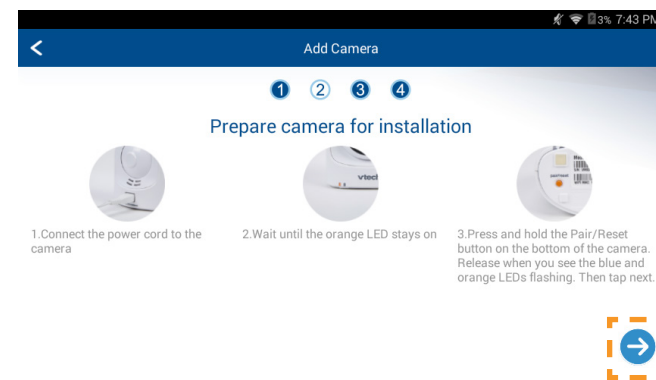

2 Add camera

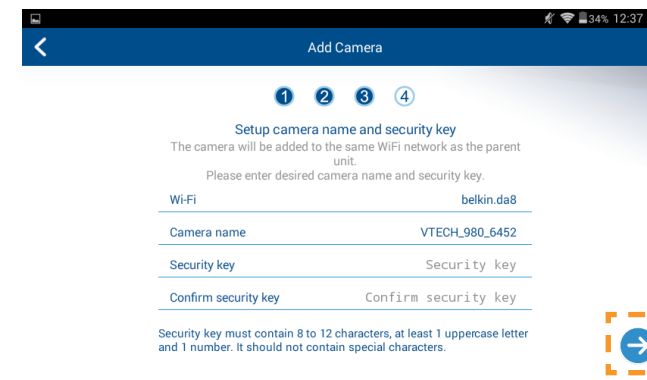

1 After connecting the parent unit to your Wi-Fi network, tap to select the VM981 camera.

2 Follow the instructions shown on screen, then tap →.

3 • Enter a security key for the camera. Repeat entering the security key to confirm. The security key must contain 8 to 12 alphanumeric characters with at least one uppercase character and one number.
• Tap → to continue.

NOTE

• Write down or remember the security key. You will need to provide the same security key if you want to access your camera remotely.

4 After the camera unit is successfully added to your parent unit, the camera list displays the preview of your camera unit.
• The camera list displays two camera previews. If you have more than two camera units, swipe to left shows more of your camera units.

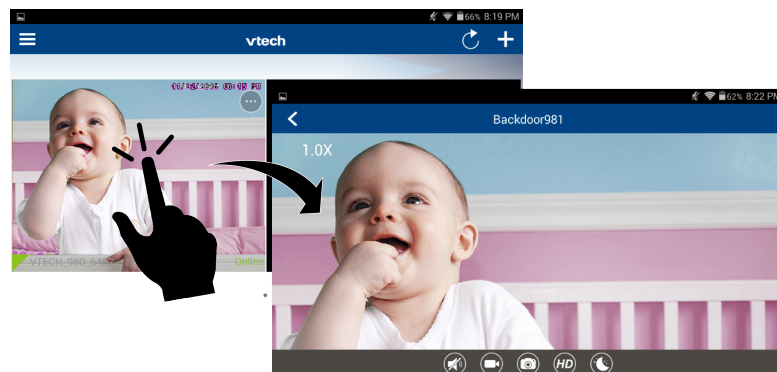

NOTE

• The camera preview will be refreshed every second.

Basic operation

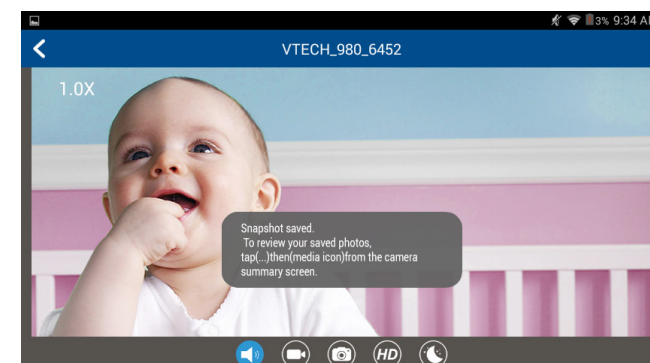

View the live camera

Tap the camera view on the camera list to go to its live view.

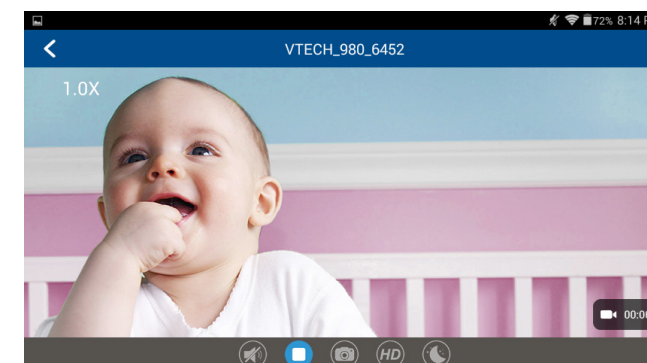

Take a snapshot

Tap 📷 to take a snapshot and save it in the parent unit.

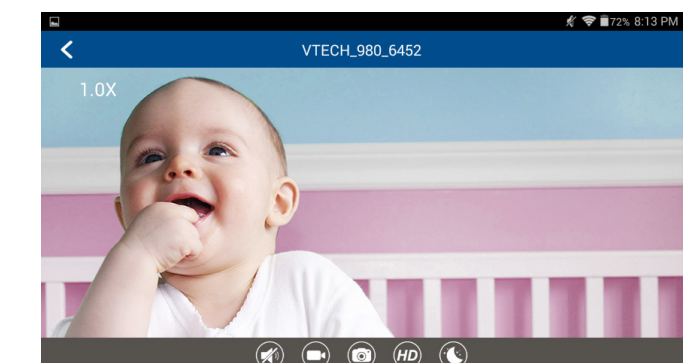

Record a video

Tap 📹 to record a video and save it in the parent unit. The icon changes to 📹 when recording. Tap it to stop recording.

Play or mute sound

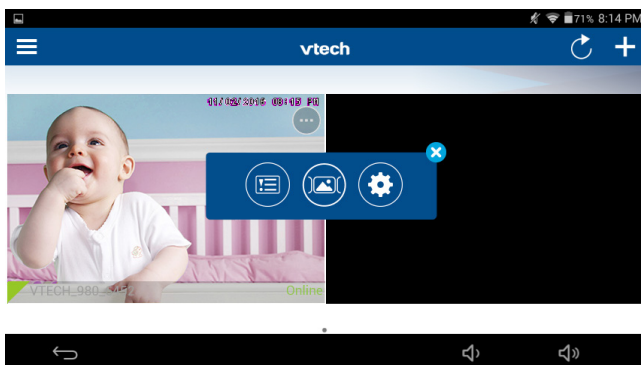

Tap 🔊 to toggle between play sound or mute sound transmitted from the camera when streaming.
• Make sure the parent unit's speaker volume is not muted.

Basic operation

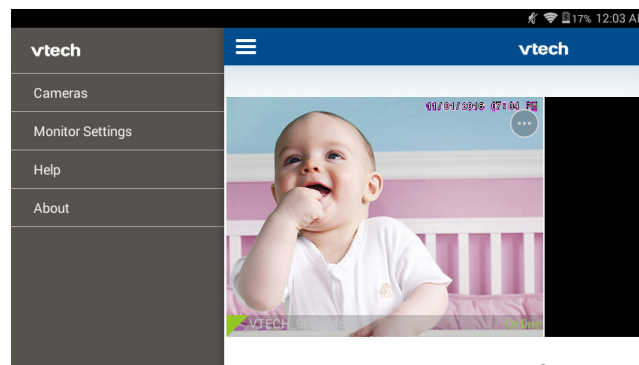

Camera settings

On the camera list, tap  of a camera, and then tap  to go to its camera settings.

Parent unit settings

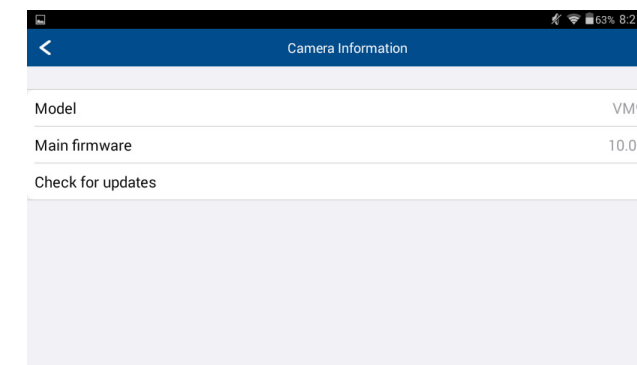

On the camera list, tap  and then tap **Monitor Settings** to go to the parent unit settings.

Update software and camera firmware

To ensure that your HD video monitor is always at its best performance, check for the camera's firmware updates and the parent unit's software updates from time to time.

- In **Camera settings**, scroll to and tap **Camera information**, then tap **Check for updates** and follow instructions.
- To check for latest software updates, tap  and then tap **Help**. Then, tap **Check updates** and follow instructions.

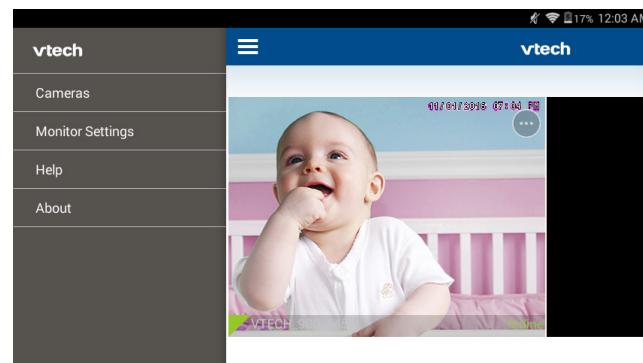

Read the online app manual for complete operation instructions

- 1 Driven by system updates, the software, app manual, and online FAQs will be updated periodically. For latest information and supports, go and check the app manual and online FAQs.
 - Tap  to display the side menu.

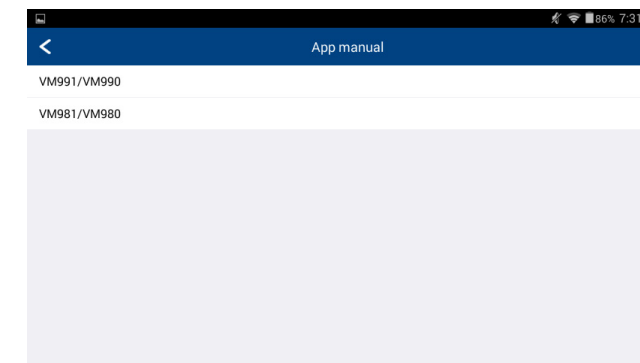

- 2 Tap **Help**.

- 3 Tap **App manual**.

- 4 Tap **VM981/VM980** to read the online app manual.

Remote monitoring

- 1 Download the free **MyVTEch Baby** mobile app from the App Store or Google Play store and install it to a mobile device, then you can use your mobile device and the mobile app to monitor your areas remotely.

NOTE

- Make sure your mobile device meets the minimum requirement for the mobile app.

Minimum requirement

The mobile app is compatible with:

- Android™ 4.4 or later; and
- iOS 8.0 or later.

Install MyVTEch Baby mobile app

1. Browse the App Store  or the Google Play store .
2. Search for the mobile app with the keyword "myvtech baby".
3. Download and install the **MyVTEch Baby** mobile app to your mobile device.

Driven by Android and iOS updates, **MyVTEch Baby** mobile app, app manual, and online FAQs will be updated periodically.

Download and install the latest mobile app. For latest information and supports, go and check the app manual and online FAQs.

- 2 Tap  to run the mobile app on your mobile device, and then create a user account.
 - We recommend that you use common webmail services, such as Google Gmail for registration of your user account.

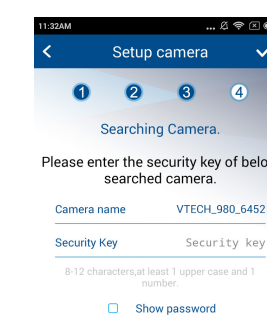

- 3 Check your email and verify your new account via the email link, then sign in to your account.

- 4 Follow the instructions on the screen to add the camera to your mobile account.
 - Make sure your mobile device is connected to the Wi-Fi network that your parent unit has connected to when adding the camera.

- 5 Type in the security key you have set for the camera with your parent unit. See Step 4 in **2 Add camera** section.

- 6 Start using your monitoring system remotely.

NOTES

- You must complete the camera setup in the above **1 Set up Wi-Fi network** and **2 Add camera** sections before you can access your camera remotely.
- Tap  on the camera list to display the side menu, and then tap **Help** to refer to the online mobile app manual for the complete operation instructions.
