VTech Wi-Fi HD Video Monitor allows you to stay close to your baby when you are on the move or away.
This monitor is Wi-Fi enabled, which uses your home wireless network to stream live video and audio through the
HD camera unit and 5-inch touch screen parent unit. It allows you to maintain a constant connection to your baby.
You can also monitor from your smartphone and mobile tablet.
VTech Wi-Fi HD Video Monitor uses MyVTech Baby app to let you instantly see and hear what's happening with
your baby from anywhere in the world. The app can be downloaded from the App Store or the Google Play™
Store, directly from your smartphone or mobile tablet.

vtech®

Quick start guide

# 1 Set up Wi-Fi connection

1 After the parent unit is fully charged,
power on the parent unit.

3s

2 Tap to select your prefered and secured Wi-Fi network
with good signal strength.

Wi-Fi Setting

Select Wi-Fi

Select a password-protected 2.4GHz Wi-Fi network for your baby
monitor from the list below. The network must be password-protected
to connect. If your network is hidden, set it to visible during
installation.

- belkin.da8
- TP-LINK_AA56
- VTE-DETESTTP
- External
- XA Ultra

3 Type in the password of the Wi-Fi network, and then
tap **Connect**.

2 Add camera

1 After connecting the parent unit to your Wi-Fi network, tap to
select the VM991 camera.

Add Camera
① ② ③ ④
Select camera model

2 Follow the instructions shown on screen, then tap ➜ .

Add Camera
① ② ③ ④
Prepare camera for installation

1. Connect the power cord to the
camera. Only plug in the LAN cable
after setup.

2. Wait until the orange LED is visible
and remains on.

3. Press and hold the pair/reset
button on the bottom of the camera.
When you hear a beep, release the
button. Tap the below blue arrow
when you hear "ready to start
pairing".
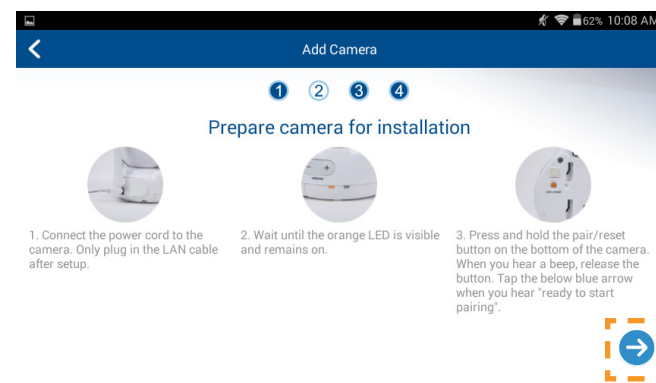

3
- Enter a security key for the camera. Repeat entering the security
key to confirm. The security key must contain 8 to 12 alphanumeric
characters with at least one uppercase character and one number.
- Tap ➜ to continue.

Add Camera
① ② ③ ④
Setup camera name and security key
The camera will be added to the same WiFi network as the parent
unit.
Please enter desired camera name and security key.

Wi-Fi	belkin.da8
Camera name	VTECH_990_507d
Security key	Security key
Confirm security key	Confirm security key

Security key must contain 8 to 12 characters, at least 1 uppercase letter
and 1 number. It should not contain special characters.

📎NOTE
- Write down or remember the security key. You will need to provide the same
security key if you want to access your camera remotely.

4 After the camera unit is successfully added to your parent unit, the
camera list displays the preview of your camera unit.
- The camera list displays two camera previews. If you have more
than two camera units, swipe to left shows more of your camera
units.

vtech
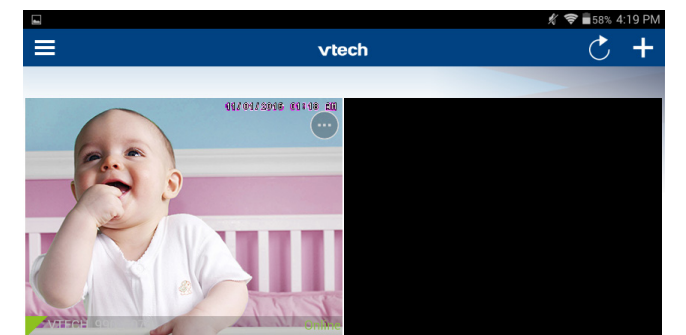

📎NOTE
- The camera preview will be refreshed every second.

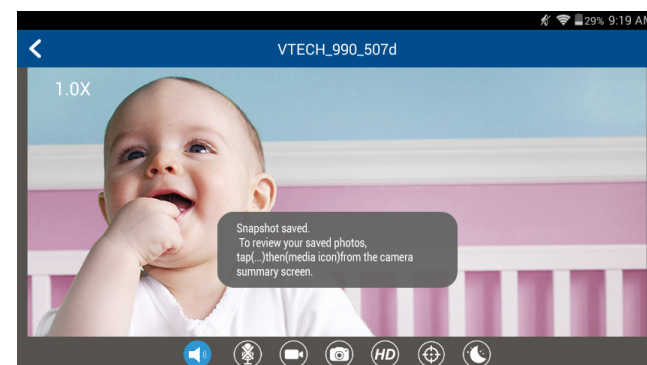

Basic operation

Talkback

Tap 🎤 to talk through the parent unit and transmit your voice to the camera's speaker.

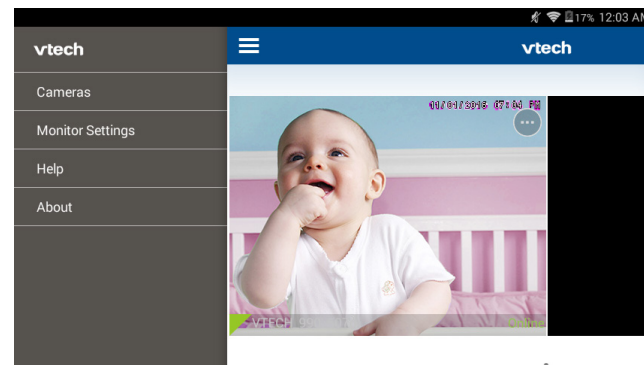

Camera settings

On the camera list, tap ⋯ of a camera, and then tap ⚙ to go to its camera settings.

Parent unit settings

On the camera list, tap ☰ and then tap **Monitor Settings** to go to the parent unit settings.

Update software and camera firmware

To ensure that your HD video monitor is always at its best performance, check for the camera's firmware updates and the parent unit's software updates from time to time.

- In **Camera settings,** scroll to and tap **Camera information,** then tap **Check for updates** and follow instructions.
- To check for latest software updates, tap ☰ and then tap **Help**. Then, tap **Check updates** and follow instructions.

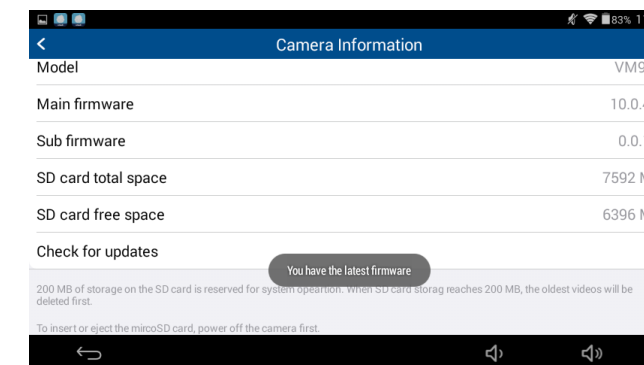

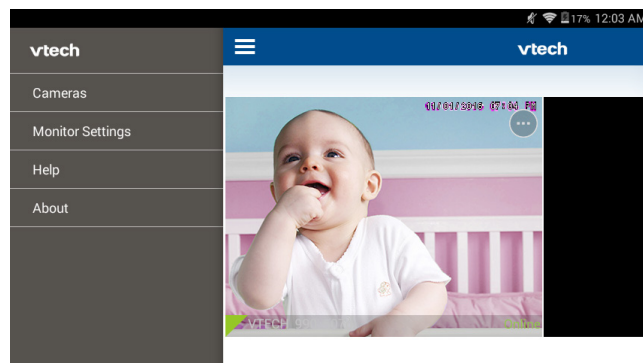

Read the online app manual for complete operation instructions

1 Driven by system updates, the software, app manual, and online FAQs will be updated periodically.

For latest information and supports, go and check the app manual and online FAQs.
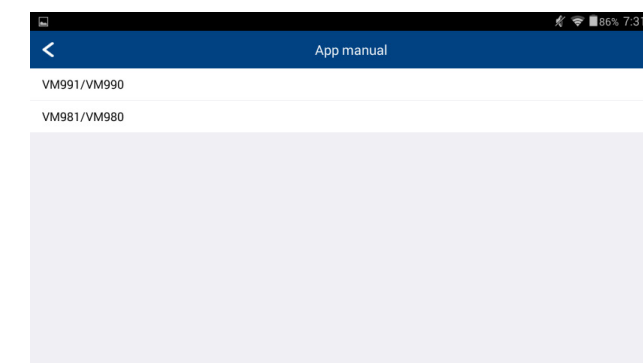

- Tap ☰ to display the side menu.
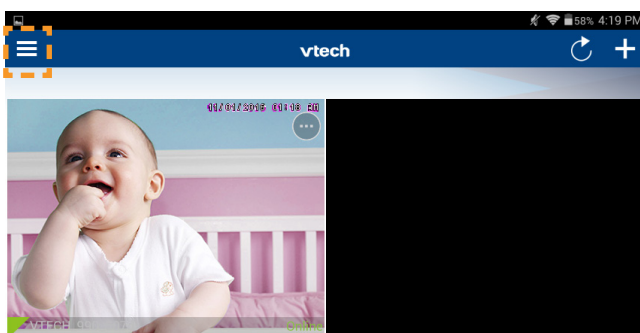

2 Tap **Help**.

3 Tap **App manual**.

4 Tap **VM991/VM990** to read the online app manual.

Remote monitoring

1 Download the free **MyVTech Baby** mobile app from the App Store or Google Play store and install it to a mobile device, then you can use your mobile device and the mobile app to monitor your areas remotely.

🔗 NOTE
- Make sure your mobile device meets the minimum requirement for the mobile app.

Minimum requirement
The mobile app is compatible with:
- Android™ 4.4 or later; and
- iOS 8.0 or later.

Install MyVTech Baby mobile app
1. Browse the App Store 🔵 or the Google Play store ▶.
2. Search for the mobile app with the keyword "myvtech baby".
3. Download and install the **MyVTech Baby** mobile app to your mobile device.

Driven by Android and iOS updates, **MyVTech Baby** mobile app, app manual, and online FAQs will be updated periodically.

Download and install the latest mobile app. For latest information and supports, go and check the app manual and online FAQs.

2 Tap 📱 to run the mobile app on your mobile device, and then create a user account.
- We recommend that you use common webmail services, such as Google Gmail for registration of your user account.

**3** Check your email and verify your new account via the email link, then sign in to your account.
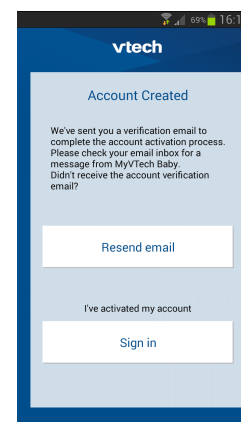

4 Follow the instructions on the screen to add the camera to your mobile account.
- Make sure your mobile device is connected to the Wi-Fi network that your parent unit has connected to when adding the camera.

5 Type in the security key you have set for the camera with your parent unit. See Step 4 in **2 Add camera** section.
6 Start using your monitoring system remotely.
🔗 NOTES
- You must complete the camera setup in the above **1 Set up Wi-Fi network** and **2 Add camera** sections before you can access your camera remotely.
- Tap ☰ on the camera list to display the side menu, and then tap **Help** to refer to the online mobile app manual for the complete operation instructions.
