

Appia Communications Certifies Interoperability with VTech

St. Louis, MS, May 1, 2017—Appia Communications, a leading provider in cloud-based business communication and networking services, and VTech Communications, Inc., a global leader and manufacturer of SIP-based phones, have certified interoperability.

The two companies have joined forces to provide businesses across the country with reliable, cost-effective, and flexible business communication systems.

“We are very excited to expand our partnership with VTech to provide Appia customers with the reliable and affordable communication solutions they have come to expect from us,” said Jason Ulm, Appia’s vice president of sales. “VTech’s expertise in business phones is a perfect complement to Appia’s hosted platform, making this a valuable partnership for us as Appia continues to grow.”

Comprehensive tests included auto-provisioning and interoperability of Appia platforms for hosted and on-premise deployment with VTech SIP phones, including:

- VSP715 ErisTerminal[®] SIP Deskset: supports up to 2 SIP accounts
- VSP725 ErisTerminal SIP Deskset: supports up to 3 SIP accounts
- VSP726 ErisTerminal SIP Deskset: supports up to 4 SIP accounts
- VSP735 ErisTerminal SIP Deskset: supports up to 5 SIP accounts
- VSP736 ErisTerminal SIP Deskset: supports up to 6 SIP accounts
- VCS752 ErisStation[®] SIP Conference Phone with Two Wireless Mics: supports up to 3 SIP accounts/Bluetooth[®] connectivity for headset and mobile devices
- VCS754 ErisStation SIP Conference Phone with Four Wireless Mics: supports up to 3 SIP accounts
- VCS850 ErisStation SIP Expansion Wireless Speakerphone: requires VCS752 to operate
- VSP600 ErisTerminal SIP Base Station and Cordless Handset: supports up to 6 cordless handsets/desksets
- VSP601 ErisTerminal SIP Cordless Handset
- VSP608 ErisTerminal SIP Cordless Deskset

“Our partnership with Appia will help bring more affordable, high-quality SIP options to service providers and end users around the world,” said Graham Williams, vice president, Business Phones Division, VTech Communications. “Appia’s IP PBX solutions and VTech phones will help meet more customer needs, and increase flexibility and productivity in the workplace.”

VTech ErisTerminal SIP phones are available in feature-rich desktops, conference phones, as well as convenient cordless models, and leverage different cloud, hosted and open-source telephony solutions without negatively impacting network traffic. Two desktop models, the VSP726 and the VSP736, offer high-quality audio and support for multiple lines, while a cordless handset option, the VSP601, shares the same HD audio and support for multiple lines as the desktop models with added mobility. The entire

line of ErisTerminal phones are built on a DECT 6.0 platform, providing a clear connection while making the system easily expandable with additional cordless accessories.

Businesses can expand the system up to an unlimited number of desktop phones, and up to six cordless handsets for every one VSP600 cordless base station. This means users can leave their desk and enjoy DECT 6.0 sound quality and reception on a cordless handset. The corded phone models also feature power over Ethernet (PoE) with dual Ethernet ports. Using this technology, employees at a business like an auto dealership, manufacturing facility or retail store could place base phones throughout the facility and easily move up to 150 feet away using a cordless handset.

Businesses can also improve their meetings with VTech ErisStation conference phones with two wireless mics, which scale from small offices to large conference rooms. The VCS752 features Bluetooth technology for hands-free calls and connectivity to headsets and mobile devices. For large meetings, participants can pair up to three VCS850 Expansion Wireless Speakerphones to the VCS752 for increased volume and microphone pickup.

About Appia

Appia Communications is a leading provider of Cloud-based communication and networking services. Its solutions enable customers to reduce capital spending and operating costs, and enhance productivity and customer care.
